

Datasheet

Pilot / Embarkation ladder

T-ISS

Product description

Pilot Ladder

The Pilot Ladder is a rope ladder used for the embarkation and disembarkation of pilots, as well as for crew access in general situations. The steps of the ladder are made of hardwood, except for the lower four steps, which are made of rubber.

Embarkation Ladder

The Lifeboat/Embarkation Ladder is a rope ladder used for boarding and disembarking during emergencies, as well as for crew access in general situations.
