

Datasheet

Lifebuoy Light

T-ISS

Revision 2024

Product description

The T-ISS Lifebuoy light is well known throughout the global market as a reliable and efficient lifebuoy light. It is designed to withstand the toughest rigours of the maritime environment and is completely watertight. The buoy has a self-igniting light with a lithium battery and comes with a clip.

The T-ISS Lifebuoy light is constructed of rugged polycarbonate and therefore has exceptional durability. It is activated when immersed into water without any requirement on manual operation.

Designed to meet the latest IMO/SOLAS requirements.

Dimensions

Art. no: LBL-XTQD-1 (L)

Sizes: 240 x 110 x 82 mm

Weight
300 g

IMPA Code: 330363
ISSA Code: 4701821
HS Code: 94054095

Solasflex Type II roundtop

Certificates & Standards

- SOLAS Wheelmark module B&D
- CCS
- United States Coastguard

Specifications

- Constructed of rugged polycarbonate
- Lasting Luminous Time: Minimum 2 hours
- Luminous Intensity: Higher 2 candela
- Light Power Source: Lithium battery
- Lighting Method: self-igniting when immersed in water
- Flash rate: 50 – 70 times/minute
- Operation life: minimum 2 hours
