Light Line Tape - PVC

T-ISS

Revision 13-6-2019

Product description

PVC Light Line tape is a multifunctional Low Location Light tape with photoluminescent attributes. Because of the PVC material, the tape is intended for indoor use.

The tape is widely used in many applications such as cruiseships, oil tankers, ferries, RoRo ships and many other vessel types. The product doesn't limit itself to maritime use only. It's perfectly applicable in the offshore business like factories and hallways.

The product complies with IMO A752(18) and ISO 15370 which include ships and marine technology / low location lighting on passenger ships arrangements.
