SELF-ADHESIVE FILMS

Endless possibilities for ship interior decoration

What many companies and interior designers do not yet know is that vinyl/foil has a huge range of applications. Vinyl is often still associated with the application for advertising purposes such as lettering or loose stickers. Nowadays, however, the possibilities go much further than that. In this brochure we will tell you everything you did not know about the possibilities of decoration and renovation of both interiors and exteriors of (cruise) ships, offshore platforms and FPSO's with self-adhesive vinyl. Specifically we focus on applications that are used for long term use and immediately provide an added value.

SELF-ADHESIVE FILMS CAN BE USED EVERYWHERE

Whereas previously vinyls were mainly used for flat and smooth surfaces such as plates, panels and glass parts, films are now also becoming increasingly suitable for use on more difficult substrates such as weathered coated aluminum or plastic window frames or façade panels. The possibilities and applications of Self-adhesive films have therefore increased significantly in recent years.

Film manufacturer 3M™ is one of the main drivers behind this development. With products such as DI-NOC™ (an IMO certified product), Fasara™ and Envision™, 3M have brought products in recent years that are of very high quality and are sustainable products that are specifically suitable for decoration and renovation applications. These films have such properties that in terms of quality, adhesion and durability they are comparable or sometimes even better than painting and spraying, veneering or screen printing.

COLOR AND IMAGERY REDUCE STRESS

Several studies have shown that the use of color and imagery in the interior of ships, office and other working environments has a direct influence on the labor productivity in the workplace. The use of color and carefully chosen images reduces stress and evokes positive associations. In this way productivity is stimulated and reduced absenteeism due to illness.

With vinyl coverings, complete walls can be decorated with a complete full-color print in one go. Even so that windows and doors completely “disappear” into the background because doors and window frames can also be decorated with printed film. Empty walls are thus concealed and transformed into tasteful eye-catchers.

DESIGNING THE PERFECT SHIP INTERIOR USING 3M FINISHES

Designing the perfect ship interior can be a balancing act between creating a warm and welcoming ambiance that feels like home and also imbue an element of surprise that makes your guests feel special.

DI-NOC™ vinyl surface finishes (which are IMO certified) include a wide range of innovative patterns and colors that provide many opportunities to decorate or refresh spaces while blending in with the existing decor. Spa-like bathrooms with extensive use of glass doors and partitions often add that special element to a guestroom, with the use of the right glass surface finish like FASARA™, these spaces can be used as the focal point of the room decor.

A photograph of a museum exhibit. On the left is a large, yellow-painted ship's steering wheel with a black tire-like rim. To its right is a modern, dark-colored key box with a glass front and the words 'KEY BOX' in large letters. Above the key box is a small potted plant with green leaves. The background shows other museum displays and a bright light source.

INCORPORATE THE LATEST TRENDS WITH ARCHITECTURAL FINISHES

Cruise ships or living quarters on a vessel also aim at making a striking first impression and what better space than the ship's gangways or cabins to make a lasting impression on guests or visitors. Besides their aesthetic value, these surface finishes are durable, with strong adhesion, allowing your interior to be furnished to the highest possible standard. Existing furnishings can be kept and renewed rather than replaced, meaning you can redesign your hotel space in minimal time and cost, without compromising on quality and style.

OUR SERVICES

3M™ DI-NOC™ architectural finishes: IMO certified & enabling creativity

With the addition of 225 new patterns that incorporate the latest trends, 3M™ DI-NOC™ Architectural Finishes are now available in more than 1,000 different designs, enabling almost infinite creativity. Our diverse selection of unique new products utilizes the latest technologies available, including Effect, which changes color depending on the viewing angle, and Advanced Metallic, which gives the appearance of woven metal. In addition, a new range of patterns has been added to the portfolio enabling application to exterior surfaces. Our rich assortment of finishes offers the warmth of wood grain, the texture of traditional Japanese washi paper, abstract designs inspired by nature, and many other interior and exterior design possibilities. The International Maritime Organisation has issued a Certificate of Approval to use DI-NOC Surface Finishes on ships. This certificate is available upon request.

Our Products & Services

T-ISS was established in 2003 and is an ISO9001:2015 approved company. The people behind the company have decades of experience in the Marine Industry. We perfectly understand the importance of reliable, accessible and price quality ratio products, services and turn-key solutions. Therefore, we primarily deal with the Marine Industry and can provide the fastest and most comprehensive offers on Solas Safety Products, IMO Safety Signs and Posters, Low Location Lighting, Solas Tapes and Pipe Marking Tapes.

We are extremely proud to be one of the leading players in the Marine Industry and we are dedicated to achieve much higher goals. Our long tradition of thinking in terms of solutions and our strategic and innovative approach of working, helps us in our ambition to be the market leader. We have a continuous focus on innovation and product development. Quality and the best available technology are our primary goals to meet your needs and demands, both commercially and operationally.

3M™ Platinum Graphic Select Provider™

T-ISS is a 3M™ Platinum Graphic Select Provider™. That is the highest achievable level for suppliers in the signage market. This means that we are allowed to provide guarantees independently on behalf of 3M™. These guarantees are given for the materials, the production and the assembly/mounting. What this means for you is the optimum project guarantee and complete certainty.
