## Lifebuoy Light

# T-ISS

Revision 2023

### Product description

The T-ISS Lifebuoy light is well known throughout the global market as a reliable and efficient lifebuoy light. It is designed to withstand the toughest rigours of the maritime environment and is completely watertight. The buoy has a self-igniting light with a lithium battery and comes with a clip.

The T-ISS Lifebuoy light is constructed of rugged polycarbonate and therefore has exceptional durability. It is activated when immersed into water without any requirement on manual operation.

Designed to meet the latest IMO/SOLAS requirements.

### Pictures

### Dimensions

Art. no: LBL-K36

Sizes: 83 x 83 x 238 mm

Weight  
300 g

### Certificates & Standards

- KR No. MED- MB- 1013-10  
Tested according to IMO Res. MSC.81(70), Res. MSC.200(80), Res. MSC.226(82), MSC/Circ.980 and ISO24408(2005)
- Wheelmark approval No. 2198

### Specifications

- Constructed of rugged polycarbonate
- Lasting Luminous Time: Minimum 2 hours
- Luminous Intensity: Higher 2 candela
- Light Power Source: Lithium battery
- Lighting Method: self-igniting when immersed in water
- Flash rate: 50 – 70 times/minute
- Operation life: minimum 2 hours
