Self Containing Breathing Apparatus (SCBA)

T-ISS

Product description

The SCBA (Self-Contained Breathing Apparatus) is a self-contained breathing apparatus with a six-liter volume steel cylinder and positive pressure. This self-contained breathing respirator is used by firefighters and emergency rescuers. The full package includes a steel cylinder, full face mask, back strap, supply valve, alarm whistle, and pressure reducer, all completely packed in a carrying bag. The alarm pressure is set at 46 MPa.
