

EMBARKATION LADDER COVERS

T-ISS

Product description

T-ISS Embarkation Ladder Covers, also known as protection covers or stowage bags, are heavy-duty maritime safety accessories specifically designed to protect embarkation and life-saving rope ladders during storage on board vessels. These durable covers shield ladders from harsh marine conditions, helping maintain their operational readiness and extending service life.

Manufactured from robust, weather-resistant materials, Embarkation Ladder Covers provide reliable protection against UV radiation, seawater, rain, dust, and mechanical wear. Their practical design allows for easy installation, removal, and secure stowage, ensuring that life-saving equipment remains clean, protected, and ready for immediate deployment when required.
