

### Product description

PolesPro® Pipe Marking film is a high-performance, non-PVC polyester solution designed for durable pipe identification. Manufactured according to 3M™ production specifications, it features a 3M™ base polyester, printed with Eco Solvents on a 3M™ Configured Printer, and protected with a 3M™ laminate for long-lasting performance in demanding environments.

With a 130-micron acrylic adhesive backing, it ensures strong adhesion on both smooth and rough surfaces, making it a reliable choice for industrial pipeline marking.

### Benefits

- UV-, scratch- and chemical resistant
- Seawater resistant
- Temperature resistance up to +130°C
- Usable in extreme weather conditions
- Strong adhesive, also for use at stainless steel
- No risk of corrosion under sticker
- The highest available pipemarker on the market today
