Barrier Tape

T-ISS™
safety suppliers

a Heijboer Safety Group company

Product description

T-ISS Barrier Tape provides a simple and effective way to mark prohibited, hazardous, or restricted areas. It clearly defines safety zones and helps prevent unauthorized access where additional caution is required.

Available in red/white or yellow/black, the bold contrasting colors provide high visibility and make restricted or hazardous areas easy to identify.

Barrier Tape comes in a convenient dispenser box, allowing you to pull out the required length of tape, tear it off, and store the dispenser box in a suitable place for future use.
