Datasheet
International Shore Connection (ISC)

T-ISS™ safety suppliers
a Heijboer Safety Group company

Product description

An International Shore Connection (ISC) is a standardized connection that allows a ship's fire main to receive water from an external source, such as a shore-based fire hydrant or another vessel. It provides a backup water supply for onboard firefighting if the ship's pumps or water supply system fail.

The T-ISS International Shore Connection is made of steel and is suitable for a service pressure of 1.0 N/mm². In accordance with ISC requirements, the flange has a flat face on one side and a coupling on the other for easy connection to the ship's hydrant and fire hose.

Technical Specifications

Width:	250 mm
Height:	300 mm
Length:	170 mm
Weight:	7 kg
Max. pressure:	1.0 N/mm²
Material:	BMC glass fiber polyester

Certificates and Standards

Product Information

Art. no.:	ISC-C: Complete ISC (box, flange, and sign) ISC-B: Box (box and sign) ISC-F: Flange only
HS Code:	ISC-C: 39231010 ISC-F: 74122000
IMPA:	330841 (only flange: ISC-F)

Features and Contents

Supplied in a red cabinet for high visibility, the ISC can be delivered as a complete set including the flange, box, and SafeSign signage, or as separate components.
