Product description

The FireBlanket Ultimate FI-BL0906 can be used for normal, combustion-engined and EV car fires. It can be deployed in parking garages, parking lots, shopping malls, onboard ferries, etc. The blanket can be used for all car sizes from a small city car up to large SUV models.

The ultimate Fire blanket isolates the fire, preventing further spread to avoid collateral damage, also minimizing the toxic vapor and gases. The blanket has an open weave structure, meaning it can 'breathe' to prevent buildup of gases under the blanket. The blanket is reusable and can be cleaned. It can stand peak temperatures of 1600 °C, and can withstand 1200 °C continuously. The Ultimate Fire Blanket is easy to deploy by 2 trained people, wearing PPE and SCBA.

Technical Specifications

Dimensions: 9 x 6 m (also available in other sizes)
Weight: 37 kg
Material: 96,6% Highest quality Silica, eco friendly
Temp. resistance: + 1600 °C peak
reusable: yes
shelflife: 25 year+ if properly stored

* The blanket has a tolerance of +/- 5% in width and length, which can be affected by temperature and moisture.

Certificates and Standards

Tested according to ISO EN 13501-1, NFPA701, ASTM D6413 & DIN SPEC 91489.

Product Information

Art. no: FI-BL0906
HS code: 70199000

Features and Contents

- Supplied in sturdy smartbag
- Cabinet available
- Big coloured loops for easy handling of the blanket
- Trolley and backpack available
